

Erin Teichroew

erinteichroew@weber.edu | www.linkedin.com/in/erin-teichroew | Ogden, UT

Research Interests

I am a plant community ecologist with a focus in invasive weed ecology and management as well as seed-based restoration approaches in grassland systems. I am passionate about involving undergraduate students in research and helping them to learn through hands on experiences both inside and outside of the classroom.

Academic Positions

Weber State University

Ogden, UT

Postdoctoral Fellow

July 2026-Present

- Supervisors: Dr. James Cohen and Dr. Kristin Rabosky
 - Position summary
 - Member of the PROGRESS (postdoctoral research opportunities for greater retention, engagement, scholarship and success) Fellowship program
 - Received training and mentorship in the Teacher-Scholar model, focusing on high impact teaching strategies and developing an independent research program designed for success at a primarily undergraduate institution
 - Gained experience in pedagogical techniques (e.g. CUREs, metacognition, and collaborative learning), course design, applying for and managing grants, mentoring undergraduate researchers, and developing collaborative relationships
 - Research projects focused on dryland restoration techniques to alleviate challenges with seed-based restoration including water limitations and the impacts of preemergent herbicide on germination and emergence
-

Education

Montana State University (GPA: 3.94)

Bozeman, MT

PhD: Ecology and Environmental Sciences

May 2021- May 2026

Certificate in Applied Statistics

- Advisor: Dr. Lisa Rew
- Research foci were the ecology and management of the invasive annual grass, *Bromus tectorum* (cheatgrass) and improving seeding restoration in semi-arid rangelands

Gustavus Adolphus College (GPA: 3.94)

Bachelor of Arts: Biology

St. Peter, MN

September 2017- May 2021

- Advisor: Dr. Yuta Kawasaki
- Beta Beta Beta National Biology Honors Society (2019-2021)
- Phi Beta Kappa (2021)

Teaching Experience

Weber State University

Instructor of Record

- BTNY 1403 – Principles of Environmental Science *Spring 2027
 - Will lead ~40 first-year undergraduates in an introductory course focusing on interactions between humans and our environment, covering topics including ecology, evolution, resource management, pollution, and agriculture. Course included a lab section supplementing lecture content

Guest Lecturer

- BTNY 3454 – Plant Ecology Fall 2026
 - Presented four lectures on a variety of topics including statistical analysis, invasion ecology, community dynamics and succession, and diversity to third and fourth-year undergraduates
- BTNY 1403 – Principles of Environmental Science Fall 2026
 - Presented on invasion ecology to first-year undergraduates
- BTNY 1010 – Plants: Apocalypse Prevention Fall 2026
 - Presented on invasion ecology to first-year, non-major undergraduates
- ZOOL 3300 – Genetics Fall 2026
 - Presented on the intersection of invasion ecology and genetic diversity from a management perspective to third- and fourth-year undergraduates

Curriculum Development

- Scientific Communication
 - Conceived of and developed the outline of a course focusing on scientific communication
 - Course covers different aspects of science communication including developing skills important to written, oral, and artistic avenues of communication

Mentoring

- Journal club Fall 2026
 - Led journal club for undergraduate students that met once a month, engaging them in discussions of academic literature, provided career guidance, and developed interests in research opportunities

Montana State UniversityInstructor of Record

- ENSC 410 – Biodiversity Survey and Monitoring Methods Fall 2025
 - Led 17 undergraduates in a research-based course incorporating a week of field work learning survey design and sampling strategies of different taxa; taught an introduction to data analysis and visualization in R; implemented an emphasis on scientific writing skills; all of which culminated in an independent research paper

Graduate TA

- ENSC 210 – Role of Plants in the Environment Spring 2025,
2024, & 2022
 - Assisted instructor with lecturing, lab design and execution, quiz and exam creation, and grading for 60 second and third-year undergraduates/semester
- ENSC 410/LRES 510 – Biodiversity Survey and Monitoring Methods Fall 2024
& 2023
 - Assisted instructor with lecturing, lab design and execution, quiz and exam creation, and grading for 20 third and fourth-year undergraduates and 5 graduate students/semester
- ENSC 110 – Land Resources and Environmental Science Fall 2022
& 2021
 - Assisted instructor with lecturing, lab design and execution, quiz and exam creation, and grading for 160 first-year undergraduates/semester

Guest Lecturer

- ENSC 110 – Land Resources and Environmental Science Fall 2025
& 2023
 - Presented on scientific writing and rangeland weed management to first-year undergraduates
- ENSC 443 – Weed Ecology and Management Fall 2025
 - Presented on rangeland weed management to third and fourth-year undergraduates
- WRIT 372 – Science Writing for Popular Non-Fiction Fall 2023
 - Discussed a draft of my publication (Teichroew & Rew 2024) with second and third-year undergraduates interested in science communication to a general audience

Curriculum Development

- ENSC 410/LRES 510
 - Developed several writing workshops to emphasize and enhance scientific writing skills
 - Designed statistics assignments to teach data manipulation, visualization, statistical modeling, and interpretation skills
 - Created videos of material to enhance inclusive learning approaches
- ENSC 210
 - Designed and facilitated student-directed research projects
 - Instructed students on experimental design, data analysis, and scientific writing

Mentoring

- Hired, trained, and advised eight undergraduate students as field and lab technicians
- Guided multiple early-stage graduate students through the processes of experimental design, data analysis, scientific writing, and community building

Gustavus Adolphus CollegeUndergraduate TA

- BIO 201 lab – Cell and Molecular Biology Fall 2019
 - Assisted instructor with lab execution and grading for 20 second-year undergraduates
- BIO 102 lab – Organismal Biology Spring 2019
 - Assisted instructor with lab execution and grading for 20 first-year undergraduates
- BIO 101 lab – Principles of Biology Fall 2018
 - Assisted instructor with lab execution and grading for 20 first-year undergraduates

2. *Teichroew E. B., Mumford C., and Rew L. J. (2022) Aiding native plant community recovery with seed restoration treatments in semi-arid climates. LRES Research Colloquium, Bozeman, MT. April 29, 2022. (Poster Presentation) 2022
1. Teichroew E. B., Mumford C., and Rew L. J. (2022) Aiding native plant community recovery with seed restoration treatments in semi-arid climates. Society of Range Management 75th Annual Meeting, Albuquerque, NM. Feb 6-10, 2022. (Poster Presentation) 2022

Awards and Grants

15. Recognized by the Montana State University College of Agriculture as an instructor instrumental a student's success	2025
14. 1st place for an oral presentation at the 15th annual LRES-PSPP research symposium	2025
13. 1st place in the student paper contest in Weeds of Range, Forestry, and Natural Areas at the annual Western Society of Weed Science meeting - \$100	2025
12. Western Sustainable Agriculture Research & Education Grant GW24-011 - \$30,000	2024
11. 2nd place in the student paper contest in Weeds of Range, Forestry, and Natural Areas at the annual Western Society of Weed Science meeting	2024
10. Rita Beard Endowment Scholarship - \$1500	2024
9. Graduate School Professional Advancement Grant - \$1750	2022-2024
8. College of Agriculture Student Scholar Travel Award - \$1200	2022-2024
7. 3rd place for an oral presentation at the LRES research colloquium	2023
6. 2nd place in the student paper contest in Weeds of Range, Forestry, and Natural Areas at the annual Western Society of Weed Science meeting - \$75	2023
5. 2nd place for a poster presentation at the LRES research colloquium	2022
4. Land Resources and Environmental Sciences Travel Grant - \$500	2022
3. Gustavus Alumni scholarship - \$4,000	2017
2. Gustavus President's Scholarship - \$100,000	2017
1. Duluth Superior Area Community Foundation Scholarship - \$500	2017

Service and Outreach

Peer Reviewer

- Biodiversity and Conservation 2026-Present

Annual Sweet Grass Weed Summit

April 21st, 2026

- Presented research on invasive annual grass identification as well as management approaches and outcomes to attendees of the Annual Sweet Grass Weed Summit organized and sponsored by Montana State University Extension

Park County Weed Fair

March 25th, 2026

- Presented research on invasive annual grass identification as well as management approaches and outcomes to attendees of the Park County Weed Fair organized and sponsored by Montana State University Extension

Red Bluff Research Ranch Field Day

June 4th, 2025

- Presented research on invasive annual grass management to attendees of the first Montana State University Extension sponsored Red Bluff Field Day

MSU STEAM Day

April 13th, 2024

- Supervised and mentored a group of eight middle school aged girls from schools across Montana as they learned about future careers in STEAM fields

Aided Hiring Committees

- Assistant Professor of Rangeland Grazing Ecology and Management May 2025
- Assistant Professor of Agroecology at Montana State University January 2025
- Assistant Professor of Precision Agriculture at Montana State University January 2024
- Assistant Professor of Soil Nutrient Management at Montana State University April 2023
- Assistant Professor of Remote Sensing at Montana State University December 2022

Workshops & Trainings

New Faculty Retreat, Center for Excellence in Teaching & Learning, Weber State. August 2026
University

- Multi-day professional development workshop focusing on topics such as DEI, self-care, creating our learning environments, integrating technology and diverse pedagogies into our classrooms, and community building

Collaborative Institutional Training Initiative

July 2026

- Completed several CITI trainings focused on research ethics and the responsible conduct of research
 - Physical Science Responsible Conduct of Research – Expires July 2029
 - Social & Behavioral Research – Expires July 2029
 - Conflicts of Interest – Expires July 2030

Improving Responses to Student Writing, Montana State University Writing Center

August 2025

- Session focusing on learning how to optimize feedback on student writing that encourages growth in written communication

GradCat Spring Summit, Montana State University Graduate School

April 2023 & 2024

- Professional development conference focusing on improving inclusivity in classrooms and strengthening professional skills

Quantitative Community Ecology in R, Dr. Martin Dovciak, Ecological Society of America

August 2023

- Short course offered at the Ecological Society of America's annual conference

Fostering Equity, Inclusion, and Belonging in LRES, Dr. Chrissy Stachl

April 2023

- Small group discussions on cultivating a sense of belonging and confronting unconscious biases
